Profile Summary

Results-driven Software Developer with 2 years of experience designing and building scalable full-stack applications using Angular, .NET Core, and Microservices architecture. Proven track record of delivering secure REST APIs, optimizing application performance, and implementing reliable asynchronous communication using RabbitMQ and gRPC. Strong expertise in Clean Architecture, CQRS, and distributed systems, with a passion for writing maintainable, well-tested code and driving measurable improvements in performance and reliability.

Technologies

Languages: C#, JavaScript, TypeScript

Frameworks & Tech: HTML, CSS, SCSS, Angular, React.js, MERN, MEAN, .NET, RESTful APIs, Microservices, CQRS, Clean Architecture, gRPC, SignalR, API Gateway, CORS, D3.js

Database & Caching: Oracle SQL, MySQL, PostgreSQL, MongoDB, Entity Framework, LINQ, Redis

Messaging & Tools: RabbitMQ, Serilog, GitHub, GitLab, Azure DevOps, OOPS, SDLC, Agile Methodology

Experience & Internships

Software Developer, Propel Technology Group Inc. | Full-time August 2024 – Present

Working as a Software Developer, contributing across the complete software development lifecycle by developing enterprise web applications using Angular and .NET Core. Responsible for building responsive user interfaces, developing secure RESTful APIs and scalable microservices, optimizing application performance, and implementing reliable distributed solutions while following Clean Architecture, CQRS, and software engineering best practices.

Web Development Intern, DLK Technologies India Private Limited | Internship July 2023 - Sept 2023

Gained hands-on experience in data center operations and developed a secure messaging platform, incorporating user authentication through LDAP Active Directory integration, which increased user engagement by 75% and reduced manual input by 50%. Also enhanced security protocols by implementing JWT verification to fortify the platform.

Professional Development

Angular Advanced (Deep Dive) – *Udemy* December 2024

SQL development (Oracle) – *QSpiders* May 2024

Full stack Web Development – *Udemy* October 2023

Projects

Partner Taxation Platform

- Developed responsive and scalable web applications using **Angular**, building reusable components with **RxJS**, custom directives, and **Reactive Forms** for complex business workflows.
- Optimized frontend performance by implementing **lazy loading**, reusable **SCSS** components, and UI animations, reducing application load time by **40%** and CSS redundancy by **30%**.
- Developed interactive user interfaces including multi-state workflow screens, real-time updates using **SignalR**, and drag-and-drop data visualizations using **D3.js**, enhancing overall user experience.
- Improved application quality by achieving over **95% unit test coverage** using **Jest**, ensuring reliable and maintainable frontend code.
- Designed and developed scalable backend services using **.NET Core**, **Clean Architecture**, and **CQRS with MediatR**, enabling modular, maintainable, and loosely coupled applications.
- Built secure **RESTful APIs** with **JWT authentication**, role-based access control, and custom permission-based authorization for enterprise-grade application security.
- Implemented synchronous and asynchronous microservice communication using **gRPC** and **RabbitMQ**, including retry mechanisms, Dead Letter Queues (DLQ), and distributed Correlation ID propagation.
- Integrated **Redis caching**, **Serilog**, **FluentValidation**, and centralized exception handling middleware to improve application performance, observability, and reliability.
- Built REST APIs supporting CRUD operations, pagination, searching, filtering, data export, and summary calculations while implementing design patterns including **Repository**, **Unit of Work**, **Factory**, and **Strategy**.
- Managed database schema evolution using **Entity Framework Core Migrations**, optimized database queries with **LINQ**, and enhanced API usability through **Swagger/OpenAPI** documentation.

Education

Anna University, C. Abdul Hakeem College of Engineering & Technology,
Bachelor of Engineering, Computer Science

2020 - 2024

- CGPA: 8.78/10.0
